

## Thinking Question

Explain the differences between elements, compounds and mixtures. Make sure you include examples in your answer.

When you answer this type of question there are a few things you should make sure you do:

- Write an introduction that briefly says what you will talk about.
- Give definitions of the key words in the question.
- Draw labelled diagrams if you can.
- Have paragraphs.
- Write a conclusion that sums up the original question in a few short sentences.
